Re-fixation of input output norms in respect of Advance Authorization No. 0310385209 dt. 19.06.2006.	

Decision: The Committee considered the case as per agenda alongwith other relevant papers and observed that this case was decided by NC in its meeting held on 04.01.2007. The item of imports at S.No. 3 & 4 i.e Hot melt adhesive glue & Release paper were disallowed therein as justification for the use of these items in the export product was not explained. Without having complete manufacturing process pertaining to the case, Norms Committee is unable to decide the inputs technically. Now, firm informed that prepared adhesive based on plastic (two component laminating adhesive consisting of (A) Adhesive (polyurethane solution 66% Resin content and 34% solvent and (B) Additive (Poly Isocynate solution containing 50% solid and 50% solvent) is coating material sued during the process of conversion from yarn to tape whereas the Hot melt adhesive glue is altogether a different item and cannot be used at the stage of conversion of yarn to tap but is required to be used to affix the release paper on back surface of the Hook Tape and Loop Tape. Accordingly, Committee in consultation with the representatives of technical authorities present in the meeting decided to call for the following information from applicant firm before taking final decision in this case: -

- (i) GSM of glue content in the hook tape & loop tape
