Subject: Fixation of Adhoc norms for export Automotive Castings (Machine) against advance authorisation no 0810114560 dated 27.8.2012 for M/s, Fitcast Founders & Engrs Pvt Ltd

DGFT may please refer to the reply received from M/s, Fitcast Founders & Engrs Pvt Ltd, vide reference no Nil dated 29.4.2013 for fixation of input output norms in respect of subject export product.

In this connection, it is stated that unit is exporting Automotive casting machined qty- 600 MT and sought import of resin -88.21 MT and catalyst -44.90 MT for casting the casting for export products. Unit in their reply has stated that the Resin which is Urea Formaldehyde and furfural alcohol, will be used with sand to make mould and core and will be required as 0.147 MT for manufacturing of one MT of casting. Similarly the Catalyst which is a Para toluene sulphonic acid and will be used with sand and resin for creating a hard bond by self hardening phenomena and will be required as 0.0735 MT for manufacturing of one MT of casting.

Unit is a registered SSI for manufacturing of SG Iron and cast iron castings. The unit has mentioned the requirement of inputs as shown above, and sought import of both the products indicating the Export weight of castings, i.e the import of relevant Resin $600 \times 0.147 = 88.2$ MT and of relevant Catalyst as $600 \times 0.0735 = 44.1$ MT. This office recommends the qty of both the imported inputs as applied for.

This issue with the approval of Director(ME) for taking a view by NC.
