3. The following decisions regarding the procedure for recognition of PSIAs and issue of PSIC were taken by the committee:

- i. It was seen that various PSIAs have physical presence in more than 100 countries. Committee decided that area of operation should be limited to countries where the firm has a actual physical presence (not through some agent etc). It was further agreed that if existing PSIAs submit applications for addition of area of operation after opening new branches, same may be decided expeditiously. It was further decided that area of operations for existing PSIAs may also be amended in line with decision of the committee.
- ii. Committee decided that PSIAs must declare specific instruments and inspectors corresponding to specific countries/branches, employed by them beforehand. These specific instruments & inspectors will be linked to specific countries in the online system. This may be done in step-by-step manner by calling information from all PSIAs. In future application form for recognition of PSIA may be amended to capture this information.
- iii. It was decided that online system may be configured to capture the calibration validity date of the instruments. And once the validity period expires, instruments should be automatically deactivated in the online system. These instruments could be added by the firms by way of online application after getting the instruments re-calibrated.
- iv. It was decided that verification of calibration certificates directly from the calibrating agency may be done periodically to check the authenticity of such certificates. It was agreed that AERB may flag random calibration certificates same could be verified.

- v. It was decided to review para 2.53 (d) of HBP regarding photos/videos uploaded by the PSIA to instill greater confidence in the inspection process.
