5. The committee has noted that several calibration certificates of instruments submitted along with the applications are expiring within next 1 year. The committee decided that all PSIA's shall submit valid re-calibration certificates of the approved instruments, 15 days prior to the expiry of period of calibration.

6. The committee further noted that as per Para-2.55 (f), "a PSIA can also carry out inspections in countries, where it does not have a full time equipped branch office but which falls within its area of operation, by deputing its inspectors. However, for such inspections in other countries, the PSIA will be required to give prior intimation to DGFT by sending an e-mail (at psia-travel-dgft@gov.in) and furnishing details of visit/inspection done by the Inspector in PSIC." Accordingly, the committee decided that a regular monitoring of the same is ensured.

7. Following issues were also discussed in the meeting:

i) At present PSIA has the option to either upload photos or video of inspection on our website. Earlier such photos or videos were sent on email to DGFT in haphazard manner by PSICs. However with start of mandatory online system since July 2022, these photos/videos are uploaded on the online system corresponding to a specific PSIC issued.

Tranental

ii) Perusal of dozens of PSICs on the website indicates that in none of the cases videos are uploaded by any PSIA and always only photos are uploaded. Such perusal also indicates that its hardly possible to say with certainty that physical inspection has been carried out on the basis of the photographs uploaded by the PSIA's.

iii) Keeping it in view, it was decided that One Photo of Inspector needs to be captured with empty container in the background having only one door closed (door with container number) and container number should be clearly readable in that photo. Another photo of Inspector needs to be captured with sealed container with same container number on the door clearly readable. These changes will ensure that PSIA inspector has actually visited the place of inspection.

iv) Photos of Instruments used for inspection should be captured alongwith container seal, having container seal number and instrument serial number, visible in the same photo.

v) After completing the inspection, Inspector will be required to generate the PSIC from the country of inspection only. Online module is being configured to correlate the IP address from which PSIC is issued with country of inspection and will not allow issue of PSIC in case of mismatch. Till the time such facility becomes operational, all PSICs shall contain declaration that "this PSIC has been issued from the country of Inspection by the Inspector who has actually conducted the inspection".

8. Meeting was ended with vote of thanks to the chair.
