Norms Committee Decision:

The Committee considered the case as per agenda along with other relevant papers and noted that applicant in his application has mentioned the imported input as carded or combed cotton. In such situation, the process shown in flow chart from blow room to carding, cleaning etc is contradictory and not correct. The applicant should claim wastage from carded/ combed cotton to non woven. While doing so, they should elaborate the total path from carded/ combed cotton fiber to non woven fabric and wastage at each stage of such processing. If any additional material / chemical is added for compacting of fibers to non woven fabric, its contents in the

export product may also be given.

Therefore the committee decided that the firm may be asked for clarification in this regard.
