Case No.:224/14/81-ALC2/2018	Party Name: JINDAL ALUMINIUM LTD.	Meet No/Date:4/81-ALC2/2020 17.06.2020	Status: Approved
HQ File :01/81/050/00942/AM19/	RLA File :07/24/040/00211/AM19/	Lic.No/Date:0710114342 31.12.2018	

Decision: The Committee considered the case as per agenda and noted the matter was discussed in Policy Interpretation Committee in its meeting held on 9.6.2020. PIC has observed that while deciding the norms, the essentiality of the import is one of the main factors. Inputs are allowed on the basis of essentiality and not on the basis of cheaper availability. Each case is examined by the Committee taking into consideration of all relevant factors. If an item asked by the applicant is not required, the norms committee should allow the relevant item only. In this case, ‘Aluminium Cast Strip’ is not an essential/ primary raw material for manufacturing ‘Rolled Aluminium Sheets’. Hence, the Norms Committee may decide the case accordingly. The Committee further noted that vide its letter dated 11.6.2020, the applicant has requested to allow import of ingots as against strips.

Therefore, the Committee decided to fix the ad-hoc norms as per written comments dated 08.07.2019 given by Consultant (TEC-3) as under:

ITCHS Code	Export Item	Quantity	ITCHS Code	Import Item	Recommended Quantity
76061200	Rolled Aluminium Sheets	4000000.000 Kgs	76011090	Primary Aluminium Ingots in the form of Pigs/Sows/Slabs/T-Bars.	1.02 Kgs/Kg content in the export product
Note: Description & quantity of import item may be allowed as per SION C-29.					
RA concerned may take suitable consequential action accordingly.

	Decision: The Committee considered the case as per agenda and noted the matter was discussed in Policy Interpretation Committee in its meeting held on 9.6.2020. PIC observed that while deciding the norms, the essentiality of the import is one of the main factors. Inputs are allowed on the basis of essentiality and not on the basis of cheaper availability. Each case is examined by the Committee taking into consideration of all relevant factors. If an item asked by the applicant is not required, the norms committee should allow the relevant item only. In this case, 'Aluminium Cast Strip' is not an essential/ primary raw material for manufacturing 'Rolled Aluminium Sheets'. Hence, the Norms Committee may decide the case accordingly. In view of PIC comments, the Committee decided to refer the matter to Consultant (TEC-3) for examination of the case. The case stands deferred.

The applicant has represented against the decision of the NORMS Committee whereby they were allowed 613 Kg Aluminium Granuals as reductant against export of 1000 Kg Low Carbon Ferro Chrome required for production of stainless steel 300 series having extra low carbon.

However, by considering stichometric calculation for reduction of Chromite (Cr_2O_3), Iron Oxide (FeO), Silicon Dioxide (SiO_2), retained aluminium in the product, reduction of Sodium Nitrate (Na_2NO_3) as energizer to boot the heat of formation; 15% excess requirement of Aluminium Granuals as reductant in order to get optimum chromium recovery, 99% aluminium contained in aluminum granuals and 98% yield of the alumina thermic process, the quantity of **Aluminum Granuals works out to 830 Kg instead 912 Kg**, as has been requested by the applicant for production and export of Low Carbon Ferro Chrome.

In view of the above, NC-II may allow 830 Kg Aluminum Granuals for production and export of Low Carbon Ferro Chrome (Cr: 66% Fe: 28.2%, Si: 1.5%, Al: 3.5%, Other:0,05%).
