The Committee unable to believe that export product alongwith pouch, hood with inbuilt fireman's helmet, a pair of gloves and a pair of boots, all these items together cannot be 108 Kgs. Certainly the export quantity is 262 Kgs or 370 Kgs. Accountability of 108 Kgs. for making without drawing/design, CAD/CAM, GSM, quantity of coating, it is not possible to compute the requirement of any of the product. Merely mentioning the 108 Kgs of export product on shipping bill, does not account for the requirement of fabric for export product.

The Committee needs to know that for each set of export product, how much quantity of aluminized fibreglass fabric required for each set, what is the GSM of the export product. Without the above details, it is not possible to work out the requirement of import item. In view of above, the Committee was unable to finalise the norms and constrained to reject the case.

RA may take suitable consequential action accordingly.
